

# Creating an Inline (Looks like Outlined type)

1. Type the words you want to outline. Use your name at 150 points or smaller if it won't fit.

**OUTLINE TYPE INLINE**

2. Using the selection tool, copy & paste a duplicate in front of the type you just created (it won't look any different because it is right on top of the other one).

**OUTLINE TYPE INLINE**

3. On the bottom set of type, put NONE on the fill and a 3 pt. PMS 299 stroke

**OUTLINE TYPE INLINE**

4. On the front set of type, make a white 1 pt. stroke and a PMS 485 fill

**OUTLINE TYPE INLINE**

5. If you have moved them, line them up perfectly on top of each other as shown below. Select both sets of type, go to Window>Show Align and click both horizontal and vertical centers

**OUTLINE TYPE INLINE**  
**OUTLINE TYPE INLINE**  
**OUTLINE TYPE INLINE**

6. Alter the fill and strokes to achieve the amount of white gap you would like.

**OUTLINE TYPE INLINE**

This was achieved with a 2 pt. white stroke on top  
and 5 pt. black stroke for the bottom

**OUTLINE TYPE INLINE**
