

# TRAFFIC SIGNS

Traffic signs control the flow of traffic, warn you of hazards ahead, guide you to your destination, and inform you of roadway services. As indicated below, traffic signs are intentionally color coded to assist the operator.

**RED** - stop

**GREEN** - direction

**YELLOW** - general warning

**BLACK&WHITE** - regulation

**BLUE** - motorist service (e.g., gas, food, hotels)

**BROWN** - recreational, historic, or scenic site

**ORANGE** - construction or maintenance warning

## STOP AND YIELD SIGNS

4-WAY

ALL WAY

The STOP sign always means come to a complete halt and applies to each vehicle that comes to the sign. You must stop before any crosswalk or stop line painted on the pavement. Come to a complete stop, yield to pedestrians or other vehicles, and proceed carefully. Simply slowing down is not enough. If a 4-WAY or ALL WAY sign is added to a STOP sign at an intersection, all traffic approaching the intersection must stop. The first vehicle in the intersection of a four-way stop has the right of way.

When you see a YIELD sign, slow down and be prepared to stop. Let traffic, pedestrians, or bicycles pass before you enter the intersection or join another roadway. You must come to a complete stop if traffic conditions require it.

## REGULATORY SIGNS

The United States is now using an international system of traffic control signs that feature pictures and symbols rather than words. The red-and-white YIELD and DO NOT ENTER signs prohibit access or movement.

## WARNING SIGNS

Yellow warning signs alert you to hazards or changes in conditions ahead. Changes in road layout, proximity to a school zone, or some special situation are examples of warning signs. Slow down and obey the sign. Disregarding a warning sign is not only dangerous, it is against the law.

## GUIDE SIGNS

In the guide signs category, you will find route markers, distance-and-destination signs, and informational signs.

Green signs give highway directions and guide you through highway interchanges.

Blue signs list motorist services, like gas, food, and lodging. Brown signs direct you to public recreational areas, state and national parks, historical points of interest, and scenic sites.

In Massachusetts, numbered state highway routes are posted on white, rectangular signs with black letters and borders. Interstate highway signs are blue, red, and white shields.

# CONSTRUCTION AND MAINTENANCE ROAD WORK WARNINGS

When people are repairing or constructing roadways, their work areas are protected from traffic by orange warning signs and other devices. These signs and devices may be mounted with warning flags or yellow flashing lights. These warnings help to guide pedestrians and vehicle traffic safely through a work zone and past any hazards.

Drum

Many of these warning signs use the same symbols as yellow warning signs, but you should take extra care when orange signs are posted. Traffic and road conditions around work zones often change quickly.

Barricade

In addition to posting orange warning signs, road work crews can use a number of channeling devices to keep traffic in lanes and away from hazards. Sometimes, electric warning arrow signs will direct traffic flow near a work zone.

Tubar Marker

Massachusetts has recently implemented a system which provides for civilian flaggers to work in certain work zones and construction sites and for police officers to work in other sites.

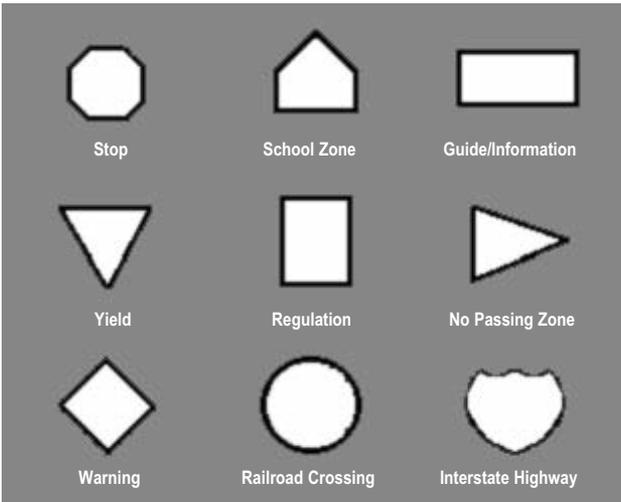

Traffic Cone

When a flag person or police officer is directing traffic around a work zone, you must obey the flagger's or officer's signals or directions.

Know signs by their appearances so you can recognize them at a distance.

Know traffic signs by their shapes

## Regulatory

4-WAY

ALL WAY

Yield

No right turn

No left turn

No U-turn

No trucks

No pedestrians

No bicycles

No parking allowed between posted hours

Traffic moves only in direction of arrow

You may not overtake another vehicle

You may *not* turn right after stopping at a red light

All traffic must go left

Keep to the right of the upcoming median or lane divider

## Warning

Traffic signal ahead

Lane merging from right, watch for other traffic

Divided highway begins

Winding road, do not pass

Road curves right

Roundabout ahead

Playground

Divided highway ends

Crossroad ahead

Area off paved road is soft dirt and could be hazardous

Stop ahead

School zone

Two-way traffic

Road entering from the right

Road narrows or right lane ends

School crossing

Road slippery when wet

Road ends at junction

You may not cross the yellow line to pass

Traffic may flow on both sides of sign

Pedestrian crossing

Deer crossing

Railroad crossing ahead

Maximum height allowed

## Guides and Directions

Interstate highway route marker

Information

Gas

Telephone

Food

Massachusetts state highway route marker

Hospital

Lodging

Access for those with disabilities

Picnic area

Junction with a numbered route ahead

Destination directions

Notice of highway exits, in miles

Point of interest

Motorist services

Destination distances, in miles

Highway mile markers

Parking facilities

Freeway interchange sign

Highway rest area

## Road Work

Work in progress on the side of the road

Road crew flag person ahead

Maintenance or public utility crew ahead

Notice

Roadway detour directions

Lighted directional signs

## RAILROAD CROSSINGS

A round warning sign will usually alert you to an upcoming railroad crossing. When you see this sign, slow down and prepare to stop. If you see or hear a train approaching, do not speed up and try to beat the train to the crossing.

The point at which train tracks cross a road is marked with a white crossbuck sign. If more than one track crosses a road, the number of tracks is posted below the crossbuck.

A railroad crossing may also feature red flashing lights, a bell, and a red-and-white striped gate that is lowered across the roadway when a train is passing. If the lights begin to flash, you must stop at least 15 feet before the light post or gate and remain stopped until the gate raises and the lights stop flashing. Failure to stop is a violation that carries a heavy fine. Even if you don't see a train approaching, never drive around a lowered gate or ignore the flashing lights.

## PAVEMENT MARKINGS

Lines, symbols, and words painted on a roadway help to direct riders and control traffic flow. You must know what the different lines and colors mean and obey them as you would traffic signs or signals.

White and yellow lines are used along pavement edges and between lanes to keep vehicles in line. These lines may be solid or broken (long dashes), single or double. A solid white or solid yellow line that turns into a dotted line (short dashes) is a continuation of the line through an intersection or a highway interchange.

Unless you are turning, exiting a highway, or changing lanes, always stay between the lines marking your lane.

### WHITE LANE LINES

White lane lines separate lanes of traffic moving in the same direction. Single white lines may also mark the right edge of the pavement.
